

Dear Sirs:I urge you to reject the National Association of Broadcasters petition 04-160 which requests the Federal Government to intervene and artificially stifle competition by denying Satellite Radio's ability to broadcast. I live and travel in sparsely populated areas. Satellite Radio has finally given me the opportunity to obtain important safety and weather information as well as entertainment and other commercial broadcasts. Our Constitution does not provide any authority to the Federal Government to carry out such an artificial interference in use of our airways.
